

Pumpfix S backwater pump station DN 100, with black cover plate

Article information

Item no.: 280451S GTIN: 4026092085516 Price group: 10

Advantages

- Drains reliably against backwater pressure
- Continuous running pump with multi-vane vortex impeller for maximum reliability
- System suitable for installation in waterproof concrete

Description

The backwater pumping station for faecal-free wastewater is equipped with one pump and two mechanical backwater valves which close automatically in the event of backwater.

Normally, draining takes place via the natural gradient to the sewer. During the backwater phase, draining takes place via the integrated pump against backwater pressure directly into the sewage channel.

- With vertically adjustable upper section for continuous height and level compensation and integrated floor drain

- System suitable for installation in waterproof concrete, groundwater resistant up to 3 $\ensuremath{\mathsf{m}}$

- Backwater protection in accordance with EN 13564 type 5
- Including socket DN 50 for inlet and cable conduit

- Pump suitable for permanent operation with multi-vane impeller for maximum operational safety

- Including float switch for level measurement

Variant	
Note on installation depth:	System suitable for installation in waterproof
	concrete
Discharge rate (l/s) with 20 mm backwater:	1,6
Mechanical backwater flaps:	2
System installation:	Waterproof concrete

General characteristics Standard: Nominal size (DN): Outer diameter (OD): Type of wastewater: Delivery state: Backwater protection: ATEX:	EN 13564 100 110mm without sewage plug-in ready Type 5 no
